Investment Strategy

The investment objective of the Sub-Fund is to produce a long-term capital appreciation and an over-performance vs. the benchmark in the long term (at least in a 5 years investment horizon). The Sub-Fund is actively managed and invests primarily in international equities listed on stock exchanges or traded on other regulated markets worldwide. These equity investments may also comprise investments in equity equivalent and/or equity linked transferable securities. The Sub-Fund can invest up to 65% of its net assets in equities issued by listed companies in emerging markets, up to 30% of its net assets in investment grade corporate and government bonds and up to 30% in corporate and government bonds sub-investment grade. All the investments are realized in accordance to UCITS standards.
